GUIDENOTE: [DELETE BEFORE PUBLISHING]

- ***Where Australian Government funding meets the thresholds described below for the Work Health and Safety Accreditation Scheme accreditation, clause 15.3 of the Special Conditions of Contract will be applicable and the relevant Annexure item should be completed accordingly to reflect this.***
- ***If this project is not the subject of Australia Government Funding or the Australian Government Funding does not meet the thresholds described, delete section 4 below.***

3. Australian Government funding

This project is the subject of Australian Government funding. Accordingly, the Australian Government requires that contractors engaged by the Principal be accredited under and comply with the Work Health and Safety Accreditation Scheme. Further information can be obtained at www.fsc.gov.au.

Work Health and Safety Accreditation Scheme

The Australian Government is committed to improving Work Health and Safety (“WHS”) outcomes in the building and construction industry. An important initiative to achieve this is the Work Health and Safety Accreditation Scheme (the “Scheme”). The Scheme is established by the *Federal Safety Commissioner Act 2022* (Cth) and specified in the *Building and Construction Industry (Improving Productivity) (Accreditation Scheme) Rules 2019* (Cth).

Depending on the value of a project, only builders who are accredited by the Federal Safety Commissioner under the Scheme can enter into head contracts for building work that is funded directly or indirectly by the Australian Government. Rule 26(g) of the *Building and Construction Industry (Improving Productivity) (Accreditation Scheme) Rules 2019* (Cth) outlines provisions applying to joint venture arrangements that include accredited and unaccredited builders.

The Scheme accreditation requirement applies to building work that is indirectly funded by the Australian Government where:

- the project includes building work of \$4 million (including GST) or more; and
- the value of the Australian Government contribution to the project is at least \$6 million (including GST) and represents at least 50 per cent of the total construction project value; or
- the Australian Government contribution to a project is \$10 million (including GST) or more, irrespective of the proportion of Australian Government funding.

Building work is considered indirectly funded where it is funded by the Commonwealth (Australian Government) or a Commonwealth authority through grants and other programs. This includes building projects where the Australian Government provides money through a funding agreement or grants to a person, for example a state or territory government who then may contract with persons who will undertake the building work or persons who will arrange for the building work to be carried out.

Indirectly funded work also includes building projects that the person, who receives Australian Government funding, facilitates by agreement (for example pre-commitment lease, Build Own Operate (“BOO”) and Build Own Operate Transfer (“BOOT”) arrangements).

If a project meets the above threshold amounts, the requirement that accredited builders carry out the building work only applies to contracts for building work that are valued at \$4 million (GST inclusive) or more.

Tenderers are referred to the Tender Form, clause 21 of the Conditions of Tender and Clause 15.3 of the Special Conditions of Contract.
